

BOL CORTEN FIRE BOWL

Our simplest expression of organic minimalism, Bol Corten fire bowl is a wide, shallow vessel spun from 3/16" (5 mm) Corten steel. Bol's low profile, fine edge detail, and patina finish are simultaneously elegant and earthy and at 42" (1067 mm) diameter, Bol fire pit is a dramatic centerpiece for any outdoor space.

The Bol corten fire bowl may be ordered with a steel grate insert for wood-burning, or with your choice of natural gas or propane burners. Our burners, approved to CSA and ANSI standards for the U.S. and Canada and CE certified for Europe, feature choice of ignition systems: a manually-lit pilot with safety thermocouple, which prevents gas from flowing when the fire pit is not lit; or electronic, with a spark pilot that is controlled by a switch. They provide a beautiful flame and cozy warmth to extend your enjoyment of the outdoors into the chilliest seasons.

Natural gas and propane versions of our Corten fire pits come complete with lava rock topping medium. Corten steel firepits are pre-weathered to provide even patina coverage.

PLEASE NOTE: the wood-burning version of Bol cannot be placed on flammable or non-heat-stable surfaces – this includes concrete slabs. Concrete may contain trapped moisture and can spall or even explode when heated.

DIMENSIONS & WEIGHT

MATCH-LIT: 42" (1067 MM) IN DIAMETER BY 9.25" (235 MM) TALL.
ELECTRONIC: 42" (1067 MM) IN DIAMETER BY 13" (330 MM) TALL.
UP TO 250 LBS (115 KG)

BURNERS:

ELECTRONIC AND MATCH-LIT IGNITION
NATURAL GAS: 69,000 BTU/H | 25 KW. PROPANE 60,000 BTU/H | 25 KW
