

# KODO CORTEN MODERN OUTDOOR FIREPLACE

Kodo is a modern outdoor fireplace of generous and dramatic proportions. A 36" (914 mm) linear fire framed in a sculptural surround of seamless Corten steel, Kodo combines the rich, variegated patina of oxidized metal with clean, minimalist design.

The Corten surround is square, 72"x72"x18"d (1829 x 1829 x 457), conveying mass and materiality and large enough to be a substantial space definer.

The heart of Kodo is a natural gas or propane burner – 60,000 BTU/h (18 kW), available with electronic ignition or match-lit – a wide strip of flame that animates the structure, warming the surrounding area and playing light and movement across the solid Corten surfaces.

## DIMENSIONS & WEIGHT

72"H X 72"W X 18"D (1829H X 1829W X 457D). UP TO 550 LBS (350 KG)
