

NIMBUS MODERN FIREPIT TABLE

Nimbus firepit table is happiest at the centre of outdoor entertaining. Designed with functional elegance in mind, Nimbus dispenses with the superfluous—clean minimalist lines, a substantial presence and sturdy demeanour. Nimbus has generous dimensions and is set at dining height for occasions that demand a generous eating surface or a dancing fire to host heated conversations.

Nimbus firepit table is 72" x 42" x 29" tall (1829 x 1067 x 727 mm) and is made of heavy gauge, durable, powder-coated aluminum. Its fire is a 36" (914 mm) linear burner that can be fuelled by natural gas or propane. The fire pit element can be covered when not in use with the flush insert plate.

The burner provides a 60,000 BTU/h (18 kW), more than enough to fire up your social events, and is available with a match-lit ignition with safety pilot, or an electronic ignition that may be connected to a switch, remote or home control system.
