

## Custom Table: Wood-Look Tile

*“Outdoor-rated wood tile is an easy and relatively inexpensive way to dress up the Plaza as a free-standing table fit for a Modern Farmhouse home. Durability and heat resistance with the look of wood are the primary advantages of leveraging this look. Tile design is always improving and high-definition looks in tile and the possibilities for texture and tone are endless. I love natural-looking wood finishes but if the space warrants a whitewashed look, tile is an easy-to-clean white option; keep the grout lines dark for the best look over time.”*

### GET THE LOOK

- **Burner Size:** 48" burner (starter and extension burner) with optional glass wind shield using framing kit
- **Product SKUs:** ODPLAZA-L24S + ODPLAZA-L24E; WS-ODPLAZA-L28S + WS-ODPLAZA-L28E; FK-ODPLAZA-L24S, FK-ODPLAZA-L24E
- **Gas Connection:** Hard pipe gas line
- **Framing/Structural Details:** Plaza table starter and extension framing kits
- **Finishing Materials:** Image shows a 6" x 24" tile. 6" tile works perfectly on the table kit with 1/4" cement board and an approximately 1/4" grout line. If the tile isn't exactly 6" wide, we recommend adjusting the grout line. Ensure outdoor-rated grout and mortar are used.

## Custom Table: Framing Kit + Propane Tank Kit

*"The 24" Plaza burner paired with the framing and propane tank kits is the ultimate fire pit solution when you are looking for a custom look but space is at a premium and hard-piped gas is not an option. Customize the look of the table by choosing tiles or materials like stucco or a metal wrap that coordinate with the outdoor space. If you are looking for a larger table, add a framing kit extension to add length at one or both ends of the table."*

### GET THE LOOK

- **Burner Size:** 24" burner (starter and extension burner) with optional glass wind shield using framing kit.
- **Product SKU:** ODPLAZA-L24S; WS-ODPLAZA-L28S; FK-ODPLAZA-L24S; LPTK-ODPLAZA-L
- **Gas Connection:** LP Tank
- **Framing/Structural Details:** Plaza table kit + propane tank kit. A propane tank is enclosed in the fire pit structure. The stainless steel door includes one-half of required ventilation and makes for easy access to the propane tank for change-out. Ventilation on the side opposite the door is required and will need to be cut from the finishing materials. Use the door as a template for the right spot and size. Table feet provide the required floor-level ventilation.
- **Finishing Materials:** Primary image shows a 6" x 24" tile. 6" tile works perfectly on the table kit with 1/4" cement board and an approximately 1/4" grout line. If the tile isn't exactly 6" wide, we recommend adjusting the grout line. Ensure outdoor rated grout and mortar are used.

### ALTERNATIVE STYLES

48" Table with 6" x 24" tiles in 1/3 offset layout

## Custom Table: Tile-Top Table

*"Cement tiles are a great way to bring pattern into a space. Loose tiles give homeowners the option to update their space as trends and tastes change and this table design uses the tiles to hide the edges of the Plaza for a more integrated look. The main image shows a coffee table but this concept could be adjusted to dining- or pub-table height with more overhang for a great dinner-party gathering piece."*

### GET THE LOOK

- **Burner Size:** 24" burner (starter burner) with optional glass wind shield.
- **Product SKU:** ODPLAZA-L24S; WS-ODPLAZA-L28S
- **Gas Connection:** Hard pipe gas line or 20-lb propane tank
- **Framing/Structural Details:** Custom board-formed concrete with galvanized steel stud internal frame
- **Finishing Materials:** Image shows a 10" x 10" cement tile with monochromatic tones for a dramatic piece; any tile size can be used with a custom metal framed top. The base shown is board-formed concrete which can be supported by an galvanized steel stud internal frame. For use with a propane tank, ensure proper ventilation, height and access is designed into the structure (see installation manual); a remote propane enclosure would also be an option. For this look you can set the tile in place instead of using grout and mortar, this allows you to install the burner under the tile and still have access for servicing with a quick removal of the tiles; just make sure to include drainage under the tile when the top is exposed to the elements.

### ALTERNATIVE STYLES

Pub Table

Dining Table

## Custom Table: Stucco/Concrete

*“Finishing the Plaza with a custom Stucco or Concrete finish brings an elegantly simple textured element to a space. It can blend with the colors of the home or pop through the use of stains. This table style is a perfect fit for any Stucco home: draw from Tudor elements, match a Mediterranean-style house, or fit right in at a contemporary-style house; the possibilities are endless.”*

### GET THE LOOK

- **Burner Size:** 72" burner (starter and 2 extension burners) with optional glass wind shield using framing kit.
- **Product SKU:** ODPLAZA-L24S + ODPLAZA-L24E (x2); WS-ODPLAZA-L28S + WS-ODPLAZA-L28E (x2); FK-ODPLAZA-L24S + FK-ODPLAZA-L24E (x2)
- **Gas Connection:** Hard pipe gas line
- **Framing/Structural Details:** Plaza framing kit
- **Finishing Materials:** Cover the table with 1/2" cement board and coat in stucco or concrete, leave raw or coat with a stain for a great rustic look. Ensure the material is non-combustible. Some sooting is normal, so neutrals or dark colors will hide more than a bright white stucco.

### RECOMMENDED LOOKS

Sandstone

Raw Concrete

Charcoal

## Fire Feature: Extra-Long Table

*“One of the most exciting things about the Plaza is the ability to build burners up to 10 feet long to meet the needs of any outdoor space. This table pairs a 10-foot burner with our framing kit which could be wrapped in patina-finished metal for an industrial look or stained concrete or stucco for a more rustic look. In an extra-long format the Plaza could be used to frame a gathering space or partition a large patio.”*

### GET THE LOOK

- **Burner Size:** 120" burner (starter and 4 extension burners) with optional glass wind shield using framing kit.
- **Product SKU:** ODPLAZA-L24S + ODPLAZA-L24E (x4); WS-ODPLAZA-L28S + WS-ODPLAZA-L28E (x4); FK-ODPLAZA-L24S + FK-ODPLAZA-L24E (x4)
- **Gas Connection:** Hard pipe gas line
- **Framing/Structural Details:** Plaza framing kit
- **Finishing Materials:** Cover the table with 1/2" cement board and coat in stucco or concrete; leave raw or coat with a stain for a great rustic look. Ensure the material is non-combustible. Some sooting is normal, so neutrals or dark colors will hide more than a bright white stucco. If you are comfortable with the implications of working with and caring for steel outdoors, a sheet-metal wrap with a patina finish yields a great industrial look, and stainless steel is an option, too, for a chic, modern, rust-free look.

## Fire Feature: Block Retaining Wall

*"The Plaza is so versatile it can be worked into hardscape features to enhance landscaping in both front and back yards. By building the Plaza into a retaining wall, a space can be framed out with a great fire feature integrated into the hardscape feature for a beautiful and multi-functional element. Or, use retaining wall blocks to build a freestanding fire pit for a structure that will look great for decades."*

### GET THE LOOK

- **Burner Size:** 72" burner (starter and 2 extension burners).
- **Product SKU:** ODPLAZA-L24S + ODPLAZA-L24E (x2); WS-ODPLAZA-L28S + WS-ODPLAZA-L28E (x2)
- **Gas Connection:** Hard pipe gas line
- **Framing/Structural Details:** 7" x 7" x 3-1/2" block
- **Finishing Materials:** 7" x 7" x 3-1/2" retaining-wall blocks can be used without cutting. Non-combustible support will be needed to support the ends of the burner. The optional glass wind shield can be added for windy locations.

Retaining Wall with Wind Screen

### RECOMMENDED LOOKS

## Fire Feature: Block Retaining Wall

*"If your client has a need for terraced retaining walls, consider building a stepped retaining wall with Plaza burners built in. We're showing one level here but the construction could continue up as far as you need to create a wall of light and flame. Or if there's a need for privacy, wind, or noise reduction, this concept addresses those issues with a back wall that can be raised as needed. The wall reflects the light and warmth from the flame back into the outdoor space, creating a cozy atmosphere. For reduced gas usage, consider installing individual burners or install a burner up to 10 feet long for a dramatic look."*

### GET THE LOOK

- **Burner Size:** 2 x 24" burner (2 starter burners)
- **Product SKU:** ODPLAZA-L24S (x2)
- **Gas Connection:** Hard pipe gas line or 2 remote propane tanks
- **Framing/Structural Details:** 7" x 7" x 3-1/2" block
- **Finishing Materials:** 7" x 7" x 3-1/2" retaining wall blocks can be used without cutting, but non-combustible support will be needed under the burners.

### RECOMMENDED LOOKS

Sandstone

Raw Concrete

Charcoal

## Fire Feature: Brick Table

*"Brick is a classic material that stands the test of time in both durability and style. A custom masonry fire pit table will last for decades and look great the whole time. Light colored brick gives a great coastal vibe or match the brick to the home for a wonderful built-in look. Be aware that soot can be expected with any fire pit, so plan color choices accordingly."*

### GET THE LOOK

- **Burner Size:** 96" burner (starter and 3 extension burners).
- **Product SKU:** ODPLAZA-L24S + ODPLAZA-L24E (x3);  
FK-ODPLAZA-L24S + FK-ODPLAZA-L24E (x4)
- **Gas Connection:** Hard pipe gas line
- **Framing/Structural Details:** Modular brick 3-5/8" x 2-1/4" x 7-5/8"
- **Finishing Materials:** Modular sized bricks can be used without cutting in this running bond configuration; switch up the brick layout to achieve different looks and sizes. With this specific layout, the wind screen doesn't fit on the fire feature.
