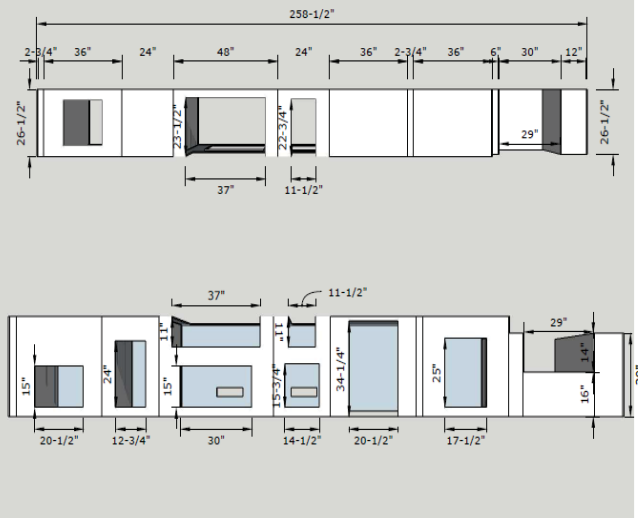
Exterus is an affordable, quality system that is professionally engineered and professionally manufactured to deliver superior value in the outdoor kitchen segment. The modular pieces are made from an engineered, galvanized steel stud and fastener system with a Permabase skin.

Features:

- Solid 20 gauge steel stud and track system protected by G90 galvanization for outdoor environments
- Permabase skin – best-in-class material, holds less than 8% moisture
- Weight-tested for the heaviest grills
- Totally non-combustible construction allows framing to be simple and easy to use
- Most pieces are made to order in 5 to 10 working days – no inventory, no mix-ups, no waiting
- All cutouts are prepared in the factory – no field modifications needed
- Most kitchens can be set up in a few hours
- Best value in the industry

OUR DESIGN GUIDE

1. PICK APPLIANCES



We provide drawings for each order, allowing you to have a scaled rendering of your appliance and layout selections. These drawings are great for marking out dimensions on a patio, or integrating the kitchen into a larger build.

2.DESIGN LAYOUT

Our modular system takes a fraction of the time of masonry block, and the open framing design allows for faster and easier placement of gas, electrical, and water lines.

3. SELECT FINISHES

Complete your project by finishing with any stone, stucco, or tile finish. Enjoy the beauty of natural finishes with the speed and ease of a pre-built system.

4. SAFELY INSTALL

PICK YOUR APPLIANCES

As part of the Exterus program, we offer **Fire Magic, AOG, and Summerset grills**. Check out our brand overviews and our stock lists for details and specs. When deciding on your outdoor kitchen features, think about how long you'll own it, how much you'll use it and what capabilities you want. Quality workmanship, grade of stainless steel, burner construction, BTUs per square inch, overall cooking space, warranty coverage, and the parent manufacturing company's longevity are all important factors. You'll have to pick for yourself but with our brands we have it all covered.

Pick Appliances:

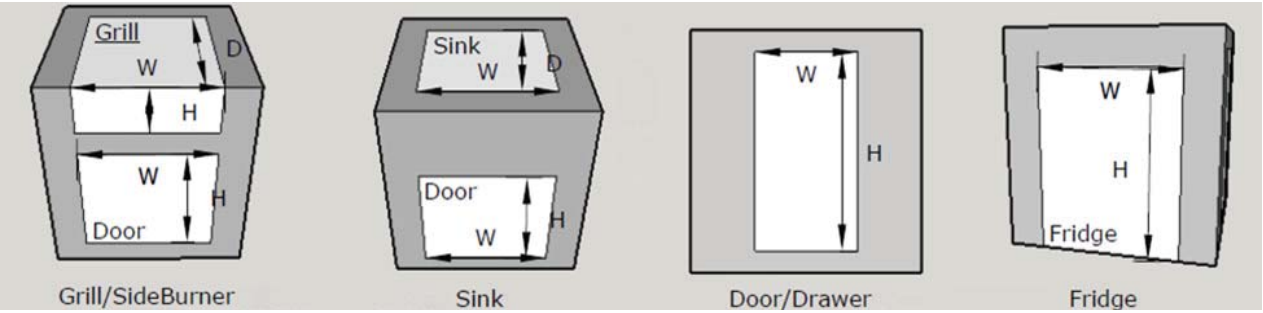
Each manufacturer makes a variety of accessories; doors, drawers, pull-outs, trash drawers, and even more! Do not underestimate these - having your paper towels or trash drawer next to your grill is important for a satisfying grilling experience. Decide up front if you want to match handles, or if you want to mix and match components from different brands.

Options:

When it comes to outdoor refrigeration and ice making, make sure you check the details. Some refrigerators are not "outdoor rated" and will fall apart when exposed to the elements. For superior performance, look for an outdoor-rated product with great warranty coverage. True Refrigeration is available through the Exterus program.

DESIGN YOUR LAYOUT

Modular outdoor kitchens come in standard-sized components that can be custom-configured in any layout and designed specifically with the contractor in mind. The components are delivered ready to be finished with appliance cutouts in place, and link together quickly and easily.



Use standard modules

CHOOSE YOUR FINISHING

Exterus modules are ready to finish. The beauty of this product is that it allows you to finish it with any exterior product you may be using in your construction project, whether it is stucco, stone or tile. You can customize your project and create an extraordinary outdoor kitchen design that accentuates your unique surroundings.

INSTALL YOUR KITCHEN

Exterus projects are created to be easy to design and install. Your Exterus dealer will be your best and primary resource for professionally installing the product. Local trade professionals who are licensed, bonded, and carry industry or trade-specific training or certifications can also be a great resource.

Exterus Express offers preconfigured kitchens with recommended grills and accessories.

There are many parts of the installation that require specific trade knowledge, so hiring a professional, following local codes, and following manufacturer specifications and directions exactly are a requirement. When installed correctly, Exterus products will give you years of enjoyment!
